Due to the rapidly evolving nature of this public health crisis, the BOP will update the open COVID-19 confirmed positive test numbers and the number of COVID-19 related deaths daily at 3:00 p.m. The positive test numbers are based on the most recently available **confirmed lab results** involving open cases from across the agency as reported by the BOP's Office of Occupational Health and Safety. BOP field sites may report additional updates throughout the day. Data is subject to change based on additional reporting.

The BOP has begun additional testing of asymptomatic inmates to assist in slowing transmissions within a correctional setting. As such, our data reflects an increase in the number of COVID-19 positive tests reflected in the table below. The BOP is able to better utilize this information for the management of an outbreak at the relevant, affected facility.

The inmate totals listed do not include inmates participating in the Federal Location Monitoring program. Additionally, the reference to the FCI Butner Low below refers to an isolation unit that is physically separated from the rest of the LSCI.

COVID-19 Home Confinement Information

Given the surge in positive cases at select sites and in response to the Attorney General Barr's directives, the

BOP began immediately reviewing all inmates who have COVID-19 risk factors, as described by the CDC, to determine which inmates are suitable for home confinement. Since the release of the [Attorney General's original memo](#) to the Bureau of Prisons on March 26, 2020 instructing us to prioritize home confinement as an appropriate response to the COVID-19 pandemic, the BOP has placed an additional **1,972** inmates on home confinement: an increase of **69.1** percent.

Due to the rapidly evolving nature of this public health crisis, the BOP will update the open COVID-19 confirmed positive test numbers and the number of COVID-19 related deaths daily at 3:00 p.m. The positive test numbers are based on the most recently available **confirmed lab results** involving open cases from across the agency as reported by the BOP's Office of Occupational Health and Safety. BOP field sites may report additional updates throughout the day. Data is subject to change based on additional reporting.

The BOP has begun additional testing of asymptomatic inmates to assist in slowing transmissions within a correctional setting. As such, our data reflects an increase in the number of COVID-19 positive tests reflected in the table below. The BOP is able to better utilize this information for the management of an outbreak at the relevant, affected facility.

The inmate totals listed do not include inmates participating in the Federal Location Monitoring program. Additionally, the reference to the FCI Butner Low below refers to an isolation unit that is physically separated from the rest of the LSCI.
